# IntesisHome®

This document describes how to connect the device to the wireless network via a wireless LAN router or access point.

Check the access point or wireless router where the device will have to be connected to. Make sure that is using 2.4GHz and b, g or n mode for the wireless communication. For specific information about the wireless access point or router, please refer to their corresponding manuals.

Make sure that the device is close enough to the wireless access point or router so there are no coverage issues.

1 Connect your device to the AC unit according to the instructions of the installation manual.

**2** Download the application from Google Play or App Store.

Direct access to download links can be found at
www.intesishome.com

3 Visit the wireless settings section of your wireless device (smartphone, tablet or laptop) and connect to the network generated by your device (DEVICE_xxxxxx).

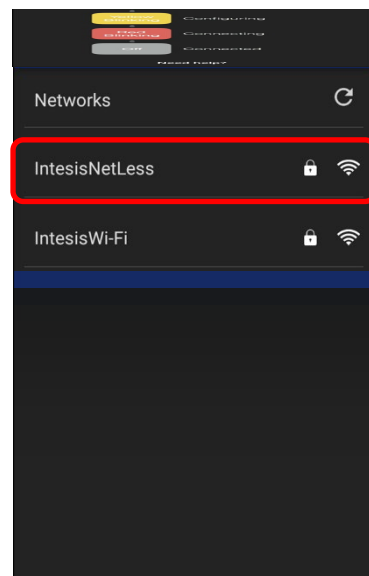

4 Click on the add device Button. **

Easy and intuitive WiFi AC Control from anywhere

Register

Login

View an example
